Slots per course-1
Duration of Course:
2 weeks every month
Course Fee- **Rs. 60,000**

Faculty

Sameera Nayak

Vishal Raval

Aditya Kapoor

Venue:
Kode Venkatadri Chowdary Campus
LV Prasad Eye Institute
Vijayawada

COURSE DESCRIPTION

The LIVE workshop is specifically designed for practicing ophthalmologists and ophthalmology fellows. The two-fold purpose of this workshop is to make the delegates familiar with the basic principles, current concepts and approach towards management of diabetic retinopathy, vascular occlusions, endophthalmitis as well as their hands-on training of retinal lasers and intravitreal injections. Only 1 slot for training will ensure one to one discussion and maximize learning. At the end of the workshop the participant will be confident in when to treat and how to treat these common but sight threatening retinal conditions. On the last day there will be a quiz for the participant consolidating & emphasize the knowledge acquired throughout the workshop.

WHAT WOULD YOU LEARN IN 2 WEEKS?

- Retinal lasers – Basics, indications, hands-on training
- Intravitreal injections – Indications, technique, wet lab and hands-on training
- Retinal diagnostics – OCT, Fundus fluorescein angiography, B scan
- Focused lectures on principles of management of diabetic retinopathy, vascular occlusions, endophthalmitis
- Specific tips to avoid complications while performing retinal lasers and intravitreal injections

TIME	PROGRAM
7.00 – 8.00 am	Morning Class
8.30 – 9.30 am	Lecture as per roster
9.30 – 1.00 pm	Retina clinic with Laser training
1.30 – 3.30 pm	Operation Room exposure with Intravitreal injection training
3.30 – 5.30 pm	2 days – Wet lab (Intravitreal injection on goats eye) 4 days – Laser on dummy eye (subject to availability) 6 days – Diagnostic posting

S.NO	TOPICS
Pre training questionnaire on laser and intravitreal injections	
1	Introduction to intravitreal injections: Technique, precautions, patient preparation, trolley preparation, gloving etc Introduction to Lasers in retina (Basics)
2	Introduction to Lasers in retina (Basics)
3	OCT
4	FFA
5	B Scan
6	Management of BRVO (when to inject, when to laser)
7	Management of CRVO (when to inject, when to laser)
8	Management of NPDR, PDR (when to inject, when to laser)
9	Management of Lattice degeneration (along with tips for LIO)
10	Management of Endophthalmitis (role of vitrectomy, IOAB)
11	Clinical pearls in management of DME
12	Laser in ROP (Theory only)
	Post training quiz
